## \*\*\* Items of Interest \*\*\*

- 1.) On behalf of the PCBC, I would like to thank Dr. Michael Hughes for his presentation on **How the Bulldog is Viewed by the Public**. It was very interesting and very informative. We are hoping to have a series of related presentations by Dr. Hughes in the near future.
- 2.) The October General Club meeting will be held on Saturday October 8<sup>th</sup> along with the AKC Sanctioned B Match, the Breeders Match and the Chili-Cook Off. The meeting/matches will be held at the Northkirk Presbyterian Church (See the ad in this Bullpup issue).
- 3.) Nominations for the three Board of Directors seats are open.
- 4.) At the September meeting, it was suggested that we move the location of the club meetings from the present location at Steinmetz Park to the Northkirk Presbyterian Church in Alta Loma where we are having the next meeting and puppy matches. We will have an open discussion on the matter at the October meeting and your input would be greatly appreciated.
- 5.) The PCBC has a Facebook page. If you search Pacific Coast Bulldog Club you should find it. Friend it today.
- 6.) If you are planning to breed your bully, don't forget to send in your entry form for your litter for next year's Futurity Stakes Match. Remember, the first half of the entry form is sent in before breeding or no later than two weeks after actual mating. The second half is sent in before puppies are 60 days old, or 10 days prior to the Futurity Match, whichever comes first.
- 7.) Congratulations to all the winners of the recent shows. You can see the results in the "Show Results" section.
- 8.) Last year the BCA Div III Rescue experienced a large number of attained dogs. Hopefully with on going education, responsible breeders, and your support, these numbers will not continue to grow. Rescue is looking for anyone willing to help on temporary basis. Any aide you can provide would be greatly appreciated. Please contact Ken Haefliger, BCA Div. III Rescue Coordinator at (805) 496-9589.

# PCBC Breeders Match, AKC Sanctioned B Match, Chili Cook-Off & General Meeting

Saturday, October 08, 2011

Northkirk Presbyterian Church  
9101 19<sup>th</sup> St  
Alta Loma, CA 91701  
SE c/o 19<sup>th</sup> and Beryl

Puppy Matches/Chili Cook-off Judge: Darlene Carlin  
Entries at 9:00 am  
Matches Start at 10:00 am  
Lunch to follow matches

All puppies 3 months to 18 months old are eligible for the AKC Sanctioned B Match.

For the Breeders Match, only puppies ages 3 months to 18 months that were bred by PCBC members in good standing are eligible.

Ribbons and awards will be given to the winners.

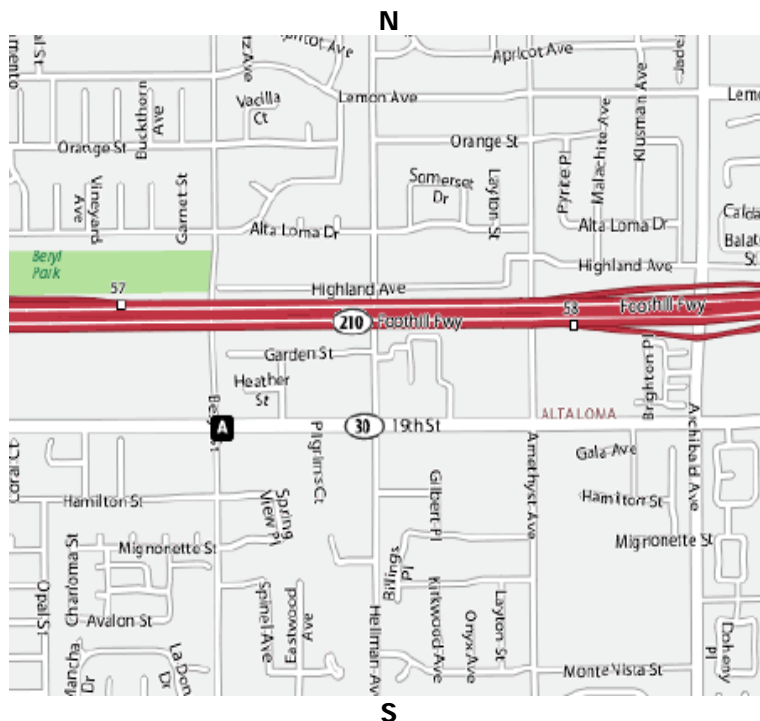

After the matches, we will be having the famous Chili Cook-off. Darlene Carlin will also be judging all those famous chili recipes you have hidden away so, get ready to cook up a batch to be this season's Chili Cook-off winner! The Board members will bring chicken and we are asking club members to bring side dishes and/or deserts.

The club meeting will be held right after lunch.

For more information please contact  
Mitch Fosmore @ 951-653-9392

## Top 10 Dog Poisons

**Dog poison #1: Medications for people.** Drugs that might be beneficial, or even life-saving, for people can have the opposite effect in pets. And it doesn't always take a large dose to do major damage. Some of the most common and harmful medications that poison dogs include:

- **Nonsteroidal anti-inflammatory medications**, such as ibuprofen or naproxen, which can cause stomach and intestinal ulcers or kidney failure.
- **Antidepressants**, which may cause vomiting and, in more serious instances, serotonin syndrome - a dangerous condition that raises temperature, heart rate, and blood pressure, and may cause seizures.
- **Antidepressants**, which may cause vomiting and, in more serious instances, serotonin syndrome - a dangerous condition that raises temperature, heart rate, and blood pressure, and may cause seizures.
- **Isoniazid**, a tuberculosis drug, is difficult for dogs to process. Even one tablet can cause problems in a small dog. Signs of poisoning include seizures and coma.

**Dog poison #2: Flea and tick products.** You may think you're doing your dog a favor when you apply products marketed to fight fleas and ticks, but thousands of animals are unintentionally poisoned by these products every year. Problems can occur if dogs accidentally ingest these products or if small dogs receive excessive amounts.

**Dog poison #3: People food.** Your canine companion may look so cute as he sits there begging for a bite of your chocolate cake or a chip covered in guacamole, but not giving him what he wants could save his life. Animals have different metabolisms than people. Some foods and beverages that are perfectly safe for people can be dangerous, and sometimes fatal, for dogs.

- **Chocolate.** Though not harmful to people, chocolate products contain substances called methylxanthines that can cause vomiting in small doses, and death if ingested in larger quantities. Darker chocolate contains more of these dangerous substances than do white or milk chocolate. The amount of chocolate that could result in death depends on the type of chocolate and the size of the dog. For smaller breeds, just half an ounce of baking chocolate can be fatal, while a larger dog might survive eating 4 to 8 ounces. Coffee and caffeine have similarly dangerous chemicals.
- **Alcohol.** Symptoms of alcohol poisoning in animals are similar to those in people, and may include vomiting, breathing problems, coma and, in severe cases, death.
- **Avocado.** You might think of them as healthy, but avocados have a substance called persin that can act as a dog poison, causing vomiting and diarrhea.

## Top 10 Dog Poisons (Cont.)

- **Macadamia nuts.** Dogs may suffer from a series of symptoms, including weakness, overheating, and vomiting, after consumption of macadamia nuts.
- **Grapes and raisins.** Experts aren't sure why, but these fruits can induce kidney failure in dogs. Even a small number may cause problems in some dogs.
- **Xylitol.** This sweetener is found in many products, including sugar-free gum and candy. It causes a rapid drop in blood sugar, resulting in weakness and seizures. Liver failure also has been reported in some dogs.

**Dog poison #4: Rat and mouse poison.** Rodenticides, if ingested by dogs, can cause severe problems. The symptoms depend on the nature of the poison, and signs may not start for several days after consumption. In some instances, the dog may have eaten the poisoned rodent, and not been directly exposed to the toxin.

**Dog poison #5: Pet medications.** Just as we can be sickened or killed by medications intended to help us, cases of pet poisoning by veterinary drugs are not uncommon. Some of the more commonly reported problem medications include painkillers and de-wormers.

**Dog poison #6: Household plants.** They may be pretty, but plants aren't necessarily pet friendly. Some of the more toxic plants to dogs include:

- **Azaleas and rhododendrons.** These pretty flowering plants contain toxins that may cause vomiting, diarrhea, coma, and potentially even death.
- **Tulips and daffodils.** The bulbs of these plants may cause serious stomach problems, convulsions, and damage to the heart.
- **Sago palms.** Eating just a few seeds may be enough to cause vomiting, seizures, and liver failure.

**Dog poison #7: Chemical hazards.** Not surprisingly, chemicals contained in antifreeze, paint thinner, and chemicals for pools can act as dog poison. The pet poisoning symptoms they may produce include stomach upset, depression, and chemical burns.

**Dog poison #8: Household cleaners.** Just as cleaners like bleach can poison people, they are also a leading cause of pet poisoning, resulting in stomach and respiratory tract problems.

**Dog poison #9: Heavy metals.** Lead, which may be in paint, linoleum, and batteries, can be poisonous if eaten by your dog, causing

gastrointestinal and neurological problems. Zinc poisoning may occur in dogs that swallow pennies, producing symptoms of weakness from severe anemia.

**Dog poison #10: Fertilizer.** Products for your lawn and garden may be poisonous to pets that ingest them.

### **What to do for suspected dog poisoning**

If you think your dog has been poisoned, try to stay calm. It is important to act quickly, but rationally.

First, gather up any of the potential poison that remains -- this may be helpful to your veterinarian and any outside experts who assist with the case. If your dog has vomited, collect the sample in case your veterinarian needs to see it. Then, try to keep your pet calm and call your veterinarian or the ASPCA Animal Poison Control Center (APCC) at (888) 426-4435. Experts at the APCC are available to answer questions and provide guidance 24 hours a day for a \$60 consultation fee.

The best way to reduce the chances that your beloved dog will be the victim of pet poisoning is by preventing exposure to dangerous substances.

- Keep all medications, even those in child-proof bottles, in cabinets that are inaccessible to your dog. If you inadvertently drop a pill on the floor, be sure to look for it immediately. Supervise anyone, such as the elderly, who may need help taking medications.
- Always follow guidelines on flea or tick products.
- Although you can give some "people foods" safely to your pets as a treat, others are toxic. If you have any questions about what is safe, ask your veterinarian. Or, err on the safe side and give treats made specifically for animals.
- Be sure any rodenticides you use are kept in metal cabinets or high on shelves where your pets can't find them. Remember that dogs can be fatally poisoned by eating an exposed rodent, so always be very cautious about using these products. Tell your neighbors if you put out rat bait, so they can protect their pets from exposure, and ask them to do the same for you.
- When buying plants for your home, opt for those that won't cause problems if your dog happens to nibble on them. The ASPCA has an online list of toxic and nontoxic plants by species. If you choose to have toxic plants, be sure they are kept in a place where your animals can't reach them.
- Store all chemicals and cleaners in pet-proof areas of your home.

## Bulldog Humor

Question: Why do bulldogs have flat faces?

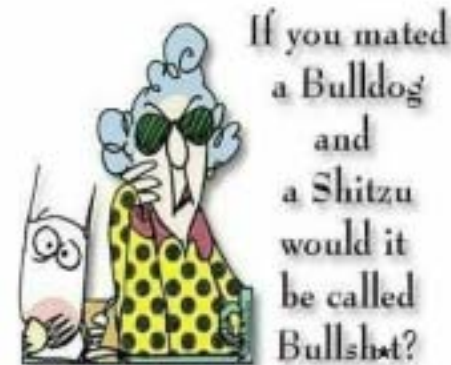

Answer: From Chasing parked cars.

### Liver & Cheese

The Taco Bell chihuahua dog, a doberman, and a bulldog all walk into a bar. A female collie then walks in. The collie says, "Whoever can say liver and cheese the most creatively, can have me. So the bulldog goes "I love liver and cheese" The collie says "Not good enough" The doberman says "I hate liver and cheese" The collie goes, "Not creative enough" Then the chihuahua dog says, "Liver alone, cheese mine."

### 911

The agitated woman had rung 911. "Police, fire or ambulance?" asked the operator. "I want a vet!" demanded the panic stricken woman. "A vet?" said the emergency service operator in surprise. "What for?" "To open my bulldog's jaws." "But why did you ring 911 ?" "There's a burglar in them."
