## Tail Article

### EDUCATING OURSELVES on the BULLDOG'S TAIL/TAIL SET

As an AKC Member Club, PCBC strictly follows the AKC Bulldog Standard which clearly describes the Bulldog's preferred tail set and types. "Tail--The tail may be either straight or "screwed" (but never curved or curly), and in any case must be short, hung low, with decided downward carriage, thick root and fine tip. If straight, the tail should be cylindrical and of uniform taper. If "screwed," the bends or kinks should be well defined, and they may be abrupt and even knotty, but no portion of the member should be elevated above the base or root." (source: *AKC Bulldog Standard*)

An incorrect tail set or type is not a disqualifying fault, but can be penalized; as a proper tail set or type can be rewarded. In the 100 point scale of the Bulldog, the tail is worth 4 points, similar in value to coat color, stop, forelegs and elbows and weighted more important than gait, hind legs, feet, teeth, eyes and eyelids.

The position of the tail, or tail set, is extremely important and helps define the topline of a bulldog which is roached back, not flat (see image 1). Tail sets should be set low, after the top of the back and remain close against the dog or downward; not carried straight out or upward. A high tail set (see Image 2) can skew the topline view and give the appearance of a straighter backed dog.

Image 1:

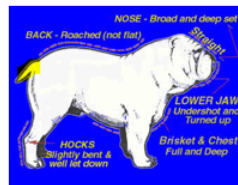

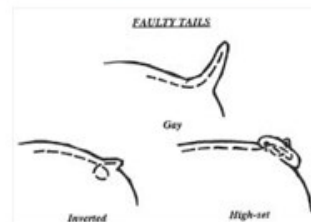

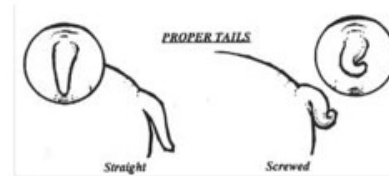

Image 2: Image

Preferred tail types are either straight or screwed; however there are many variations of each of these. Interestingly, the standard also says tail types should be short. Not to confuse ourselves, we rarely have issues with tails being too long, rather the contrary; too short or no tail is more common.

## Tail Article... Continued

Inverted tails literally can grow inward into the Bulldog's body and easily become infected, and become very painful for the dog and may have to be surgically altered or removed.

Part of grooming and taking care of our dogs include understanding their tail type and cleaning the tail area. Bulldogs have 'pockets' around their tails which should always be kept clean and dry to avoid infections and smells. Daily wipes and or weekly cleaning with a gentle soap/cleanser and drying thoroughly around and underneath the tail should be a regular part of the care and maintenance of our dogs. If a dog is unusually sensitive or irritated by the touch or cleaning of this area, it is recommended to consult with your vet.

Always pay particular attention to tails and sets as well as other characteristics outlined in the AKC Bulldog Standard when breeding and picking puppies.

### BREEDER'S CONDUCT

1. Anyone breeding his or her bitch bears a great responsibility to the future of the breed. Therefore, a breeder shall plan each breeding with the paramount intention of advancing and protecting the breed, and only when they are in a position to give proper care to both bitch and offspring. The owner of a bitch, if inexperienced, should consult with the breeder of the dog they own or with some other experienced breeder before undertaking any breeding.
2. Recognizing the extended growth pattern of the bulldog, the breeder shall not breed the bitch prior to 12 months of age. Back-to-back litters are not encouraged. After a bitch is five (5) years old, her owner should seek the opinion of a veterinarian regarding her health for breeding.
3. All Bulldog bitches being bred shall be sound and have typical structure and conformation and shall be of good temperament.
4. No breeder shall offer at stud any Bulldog who does not meet the above qualifications.
5. If the stud dog is unproven or has had breeding problems in the past, such information shall be provided to the owner of the bitch before the bitch is bred.
6. The owner of the stud is under no obligation to service a bitch that is not as represented by her owner or who presents serious hereditary defects.
7. Owners of stud and bitch shall sign a written agreement, clearly stating the conditions and terms of service. An agreement should also include what type of breeding will take place (natural, AI, chilled semen, frozen semen).
8. It is the obligation of the breeder to honestly and fairly inform the owner of the stud dog or bitch, as well as all buyers of pups, all known or suspected medical conditions or health problems.
9. A breeder shall be available to his buyers for whatever reasonable advice and assistance they may need.
10. No PCBC member shall engage in wholesaling litters or individual sales or consignments of pups or adults to pet shops, dealers, catalog houses or other commercial establishments, nor shall they be donated or given as prizes in contests, raffles, or fundraising events, no matter how charitable.
11. The breeder will ask the buyer(s) to advise him if they are ever unable to keep their Bulldog, so the breeder can either take the dog back or give every assistance to place it in a new home.
12. Breeders are encouraged to:
  - a. Not allow a puppy to leave for its new home before the age of 8 weeks.
  - b. Supply a pedigree of no less than three (3) generations, plus AKC registration papers.
  - c. Supply records which detail all dates and types of medical care given the pup, including all vaccinations for the pup's age.
  - d. Request that buyers take their pup to a veterinarian of their choice within 10 days of receipt, and if the pup is deemed unhealthy or if the buyer is not satisfied that the pup is as represented by the breeder, owe the buyers a full refund of the purchase price paid or another pup. (All shipping to be paid by the buyer).
